Hi Maggie,

As a component of the children's playpark project, two child height litter bins have been installed, to encourage good litter habits. These were not included in the original plan or budget.

Previously we asked users to take litter home with them or to use the black bin near the footbridge to Blacksmith's Lane, which is too high and difficult for most young users of the playpark. Since installation the bins have filled up regularly and the site is largely litter free. The cost of purchase and installation was £642.02 and we ask that the parish council consider covering the cost from its neighbourhood CIL reserve, as these bins are part of the community infrastructure at its meeting to be held on the 18th November 2026.

Many thanks.

Kind regards

Nick
